

Biodiversity Policy (Aligned with SDGs)

FROM TODAY
TO THE FUTURE

BIODIVERSITY POLICY

(Aligned with SDGs)

As Saya Holding and its subsidiaries, we are aware that the conservation and development of biodiversity are of vital importance for the future of humanity and our planet. For this reason, we adopt the following policy to protect and enhance biodiversity in all the areas in which we operate:

1- Fundamental Principles

- Biodiversity is an important element for our activities, and it is our responsibility to protect and enhance it.
- Decisions and actions aimed at protecting biodiversity will be based on scientific data and best practices. We will base our biodiversity protection decisions and actions on scientific data and best practices.
- By promoting sustainable production and consumption models, we will ensure the responsible use of natural resources.
- We will make a joint effort to protect biodiversity by collaborating with our employees, suppliers, and other stakeholders.
- As Saya Holding and its subsidiaries, we adopt the 10 principles of the United Nations Global Compact in terms of biodiversity, and when planning our activities, we focus on the following objectives based on the 17 Sustainable Development Goals (SDGs).

2- Commitments

- To conduct the necessary work to identify and protect key areas of importance for biodiversity specific to the sector.
- To take measures that minimize the negative impacts of our activities on biological diversity.
- To take the necessary steps to implement sustainable production and consumption models.

- To provide training and awareness-raising activities for our employees on biodiversity.
- To develop joint projects in cooperation with local communities to protect biodiversity.
- Biyoçeşitliliği korumaya yönelik araştırma ve geliştirme faaliyetlerine destek olmak.
- To support research and development activities aimed at biodiversity conservation.
- To ensure adaptation to all activities defined under the Convention on Biological Diversity.
